Google IT Support Professional

Microsoft Windows 10 / Linux
Unreal Engine/ Unity 3D

🧩 SOFTWARE AND TOOLS

Cybersecurity
Metasploit – Splunk – Autopsy - AzureLabs –
Docker – Wireshark - msfvenom – nessus -
recon-ng – burpsuite - johntheripper

Game Design
Excel -Blender - Maya - Photoshop -
Substance Painter - Zbrush

🧩 SOFT SKILLS

Teamworker - Problem Solver - Autonomous -
Attention to Detail - Analytical - Fast Learner
- Honest - Responsible - Passionate

💼 PROFESSIONAL EXPERIENCE

Social Media Manager
LiuYu (unpayed business)
04/2024 – present | Remote, China
- Proficient in Microsoft Excel for managing and tracking key logistical data, including contact information, delivery status, addresses, products shipped, and user ratings.
- Skilled in creating organized, detailed spreadsheets to streamline operations and ensure accurate reporting for TikTok collaborations and shipping logistics.
- Responsible for recruiting TikTok influencers to promote products.
- Skilled in content creation, videos, scripts, and infographics.
- Ability to manage content calendars, collaborate with influencers, designers, and teams to ensure smooth execution of campaigns.

Inventory Manager Associate
WIS International
05/2022 – 03/2023 | Toronto, Canada
Responsible for inspecting, managing and assuring third-party business products for companies across multiple sectors (e.g., Walmart, Home Depot, Canadian Tire, American Eagle, Loblaws, etc.).
• Inspect the levels of supplies and raw material to identify shortages.
• Ensure product stock is adequate for all distribution channels and can cover direct demand from customers.
• Record daily deliveries and shipments to reconcile inventory.
• Use software to monitor demand and document characteristics of inventory
• Report to upper management on stock levels, issues etc.

Game Designer
PuzzleCats
02/2022 – 08/2022 | Toronto, Canada
I worked as a level and game designer for a multiplayer tower defense mobile game and was responsible for the pacing, balance, learning curve, AI behavior and deck synergies
- I analyzed competitors, their key features, metrics and profitability in order to increase the competitiveness of our products. I was also responsible for quality assurance and testing of over 10 other mobile games, including cars and puzzle games.

IT Help Desk
Biotecnología Ambiental S.A. de C.V.
08/2019 – 03/2020 | Mexico City, Mexico
I have gained extensive experience in first level technical support and have processed and resolved support cases via telephone, Discord system and email.
My tasks included diagnosing and documenting failures to Biotechnologia Ambiental's platform as well as supporting end users, and providing sustainable system fixes. This also included:
- Use remote desktop tools to assist users with installation, configuration and troubleshooting
- The logging and documentation of failures via the ticket system
- Managing user accounts/permissions using Active Directory as well as access control for system security

Videogame Lab Supervisor
Mexicos Center of Digital Culture
09/2018 – 07/2019 | Mexico City, Mexico
Oversaw the development team responsible for developing new technologies (Haptic Gloves). as well as +3 Unity projects, UX/UI and game design.
- Coordinated three international events including the Global Game Jam, the Goethe Institute Gaming Conference and Ubisoft Employee Conference; and coordinated more than 10 national events.
- Oversaw a 13-person entertainment department.

DESCRIPTIONS

The **2-Room House** balances functionality and comfort, with a design brought to life from architectural plans initially created in AutoCAD. It features an open garage, a compact yet efficient kitchen, a small atrium that brings in natural light, and a charming front yard. The two cozy bedrooms and a single bathroom are thoughtfully arranged to maximize space. Large windows not only enhance the exterior aesthetic but also flood the interiors with natural light and good ventilation, creating a warm and inviting atmosphere. The design emphasizes simplicity while ensuring modern living essentials.

Wall-Less Apartment: This innovative residential design revolutionizes traditional living by offering fully customizable spaces. The apartment features movable walls and furniture that allow tenants to reconfigure their layout, creating flexible environments for both private rooms and shared areas. With an open-concept design, the space maximizes natural light and promotes fluidity between areas, adapting to the needs and lifestyles of its residents. Thoughtfully designed with sleek, modern finishes, this apartment prioritizes both functionality and style. It offers a dynamic living experience, where every corner can be transformed to suit the individual's preferences, fostering a sense of freedom and creativity in everyday life.

The **Beach Villa** is a luxurious seaside retreat that combines modern elegance with natural beauty. Its terracotta walls and wooden roofs create a warm, earthy aesthetic that complements the coastal setting. Expansive open spaces seamlessly connect indoor and outdoor living, with large sliding glass doors leading to a private pool and beachfront. A central staircase links multiple levels, surrounded by lush greenery and large windows that flood the space with natural light.
Inside, the open layout includes a spacious living area, gourmet kitchen, and ocean-facing bedrooms. The design emphasizes relaxation, with natural stone finishes and wooden accents. This villa offers a perfect blend of comfort, stunning coastal views, and innovative design.

📁 PROJECTS

Architectural Projects
Documentation available upon request

Comercial & Residential Building: This 13-story mixed-use building in Mexico City combines public commercial spaces on the ground floor with private residential units above. Shared amenities include a laundry room, workspace, recreation area, and a gym accessible to both residents and the public. A standout feature is the innovative wall-less apartment design, allowing tenants to customize layouts using movable walls & custom furniture for adaptable living spaces.

3D Architectural Render
This projects showcase 3D renders of three unique residential designs, crafted using SketchUp, AutoCAD, Blender, Maya, V-Ray, and Enscape:
- **Wall-Less Apartment**: An innovative space with movable walls and furniture, allowing tenants to customize layouts for private or shared areas..
- **2-Room House**: A minimalist suburban home with cozy interiors and functional design.
- **Beach Villa**: A luxurious seaside retreat featuring open spaces, natural elements, and stunning ocean views.

Each design leverages the full potential of these tools for versatile, detailed visuals.

Fluent in English, Spanish (Native) & Italian (Native)
